

## SEP Software Corp.

SEP Software offers a single backup and disaster recovery solution for heterogeneous environments of any size. SEP uses its patented Multi-Streaming technology to facilitate unlimited simultaneous data streams to provide some of the highest performance in the backup market.

SEP is cross-platform, multi-OS, and supports every popular database and Groupware solution available. Exceptional remote management capabilities allow users to easily and efficiently manage thousands of locations around the globe from one central location. SEP specializes in replacing multiple backup software products with one standardized solution for the entire enterprise.

## Data Security for Micro Focus

SEP is the perfect solution for all environments whether exclusively Micro Focus shops or for IT Departments running multiple Operating Systems. SEP supports all Micro Focus products including Legacy Netware, Open Enterprise Server (OES), SUSE Linux Enterprise Server (SLES), ZenWorks, iFolder, eDirectory, NSS Volumes, GroupWise, Trustee Rights and more.

# SEP for Micro Focus

## The Perfect Solution for Every Micro Focus Environment

- ◎ **Agentless Single File Restore for NSS Volumes on VMware**
- ◎ **Open Enterprise Server (OES) Cluster Ready** - SEP has the only current software that allows for full cluster support in both OES Linux and NetWare environments. Fail-over capability and recognition allow for the backup to continue in the event of node loss or failure. The backups complete from point of interruption. Nodes of an OES cluster can be physical or virtual.
- ◎ **Target Service Agent (TSA)** - Scheduled backups use Target Service Agent technology providing a complete solution. SEP's online backup and restore capability allows system administrators to natively backup and restore eDirectory entries, iFolder entries, NSS Volumes files with all Trustee Rights and GroupWise systems.
- ◎ **eDirectory** - Backup and restore eDirectory.
- ◎ **GroupWise** - Online backups for GroupWise with single email restore.
- ◎ **Storage Services (NSS)** - SEP fully backs up NSS Volumes including Trustee Rights. Using the Restore Wizard volumes are easily restored with all user permissions if data is lost or destroyed.
- ◎ **Migration from NetWare to OES** - By installing SEP, one can easily migrate NetWare files to OES by performing a simple backup and restoring to the similar file structure on the OES platform.
