

## Data Backup and Recovery In Virtual Environments

SEP sesam is a standardized and high performing data availability solution for heterogeneous IT environments of any size. SEP sesam is certified for virtualization solutions and provides an encrypted backup solution for security of your data.

## SEP sesam's Xen & Now for Citrix XenServer

SEP sesam's Xen & Now for Citrix XenServer offers Disaster Recovery and functionality for Citrix VMs, which has been previously unavailable in the marketplace. The precise depiction of the XenServer infrastructure is displayed in the management interface showing available virtual guest systems simplifying planning and execution of automated backup processes. No additional effort is required to backup and protect any XenServer environment.

By implementing SEP sesam's Xen & Now, companies realize savings in operating expenses, time and manpower.
